DIFFERENT & DELIGHTFUL

Irish fine jewellers McCaul Goldsmiths are famous for their elegant and contoured jewellery. The super contemporary hand-forged collection is minimalistic and characterised by fluid, sweeping lines. For instance, the 18-karat rose gold, high polished twisty loops are set with 22 twinkling cognac diamonds; the 18-karat white gold and diamond earrings suspend marquise-shaped rubilated quartz. The highly stylised and lightweight gold wire earrings are hand formed and bear the triple loop motif, while the well-proportioned forged 18-karat gold earrings are pave-set with 26 diamonds set at the tapering loops. White gold drop earrings branch out as delicate stems partially set with diamonds, and the 18-karat white gold diamond set earrings have a mirror-polished finish and are castelle set with over 100 white diamonds. Play to the gallery with these superlative earrings.

FLIGHT OF FANCY

Ace jewellery designer Payal Mehta of Payal New York draws inspiration from Richard Bach's novella 'Jonathan Livingston Seagull' for her new Bird collection that is designed to pay tribute to women of courage.

The story line of the collection taps on the inner strength, vision and determination to conquer dreams that lead to transcendence, like the seagull in Bach's fable. Each piece is a powerful narrative reminding the wearer that she possesses the power to let herself and others soar free.

According to Payal, the pieces represent the movement from mediocrity to a "higher plane of existence" in which peace is found through perfection of knowledge. The real power is when you transfer your knowledge to others and this is exactly what the artist wants to convey. The Bird collection consists of one-off bracelets, earrings and necklaces that subtly fit into the wearer's style statement.

GOLDEN PALMS

Extremely Piaget, introduced in 2016, is an open-ended capsule collection, conceived to evolve over time with the addition of exciting new creations. This time, eight new masterly pieces have been added bearing that distinctively "Piaget look".

The Extremely Piaget Palm Tree collection interpreted in gold evokes the sea, warmth, sunshine and the spirit of carefree days. The textures and structure of the palm leaf showcase the signature goldsmithing technique unique to Piaget. The "Décor Palace" is an engraving process that endows gold with a fabric-like feel of raw silk. By using this decor, every leaf shimmers and scintillates with brilliance accentuating the sparkle of diamonds.

The collection in pink and white gold captures the glow of gold and the endless sparkle of diamonds like no other.
